Summary

Aspiring full-stack engineer with hands-on experience in **JavaScript**, **Python**, **React**, **Node.js**, **Express**, **PostgreSQL**, **HTML**, and **CSS**. Built multiple full-stack applications and a personal portfolio website through independent development work. Comfortable troubleshooting software issues, improving responsive design, and working across frontend and backend systems. Strong problem-solving and communication skills with experience in Linux and Windows environments.

Technical Projects

Portfolio Website

- Built a responsive portfolio using React, JavaScript, HTML5, and CSS3 to showcase projects and development work
- Developed reusable components and a modular UI structure with mobile-first, cross-browser design
- Implemented a Node.js + Express backend endpoint for a contact form with JSON validation and input handling
- Managed version control using Git with structured commits and branching workflow

FeelClear (Emotional AI Clarity App)

- Built a full-stack application focused on emotional reflection and self-awareness
- Designed a system for users to reflect on and better understand their emotional patterns
- Integrated an AI-powered feature using **Mistral AI** to support user reflection and enhance input processing
- Implemented backend APIs using Node.js and Express for handling user data and AI requests
- Structured frontend using React with a minimal, distraction-free UI design

QuestTracker (Gamified Productivity System)

- Developed a full-stack productivity application inspired by RPG-style progression systems
- Built a quest-based task system where users earn XP and level up through task completion
- Implemented a penalty system for missed tasks to reinforce consistency and accountability
- Designed backend services using Node.js and Express for managing tasks and progression state
- Structured system logic for rewards and consequences based on task outcomes

Skills

Languages: JavaScript (ES6+), HTML5, CSS3, SQL, JSON, Python3

Frontend: React, Responsive Design, Mobile-First Development, Accessibility (a11y)

Backend: Node.js, Express.js, RESTful APIs, Middleware, API Integration

Database: PostgreSQL, CRUD Operations, Data Modeling

Tools & Environments: Git, GitHub, Linux, Windows, Command Line, Figma, AI Integration (Mistral AI API)

Professional: Problem-Solving, Communication, Technical Troubleshooting

Certifications

Full-Stack Engineer

Codecademy

Issued: Dec 2025

Credential ID: [ffd0f42cce1a44e9a0108b365047a0a6](#)

Computer Science

Codecademy

Issued: July 2026

Credential ID: [05009c20e9174378acd37e6c2d0fbfc4](#)

Front-end Engineer

Codecademy

Issued: July 2026

Credential ID: [2682884a0719474f96407efe432fdd87](#)

Education

Full-Stack Engineering Program (Online)

- Built multiple full-stack web applications using React, Node.js, Express, and PostgreSQL
- Gained hands-on experience with APIs, databases, and frontend/backend development

High School Student — Currently enrolled
